CLASS C 504 - C 600

Electronic edgebander with hot melt glue and PRE-MILLING UNIT included

C 504 and C 600

WITH PATENTED PRE-MILLING UNIT FOR AN HIGH-QUALITY EDGEBANDING

THE PERFECTION OF EDGEBANDING WITH PRE-MILLING ALSO ON COMPACT EDGEBANDERS

- TO ELIMINATE CHIPPING CAUSED BY PANEL'S CUTS
- TO ELIMINATE THE TAPERED CUT OF SCORING UNIT
 - TO ELIMINATE SWELLING DUE TO DAMPNESS

CLASS

Class C 504 with its exclusive patented pre-milling unit, joins simpleness and technology with low investments. That's possible thanks to an innovation simple to use that represents a real revolution in panel edgebanding quality, eliminating any defects of hewing, chipping, cut and swelling due to dampness.

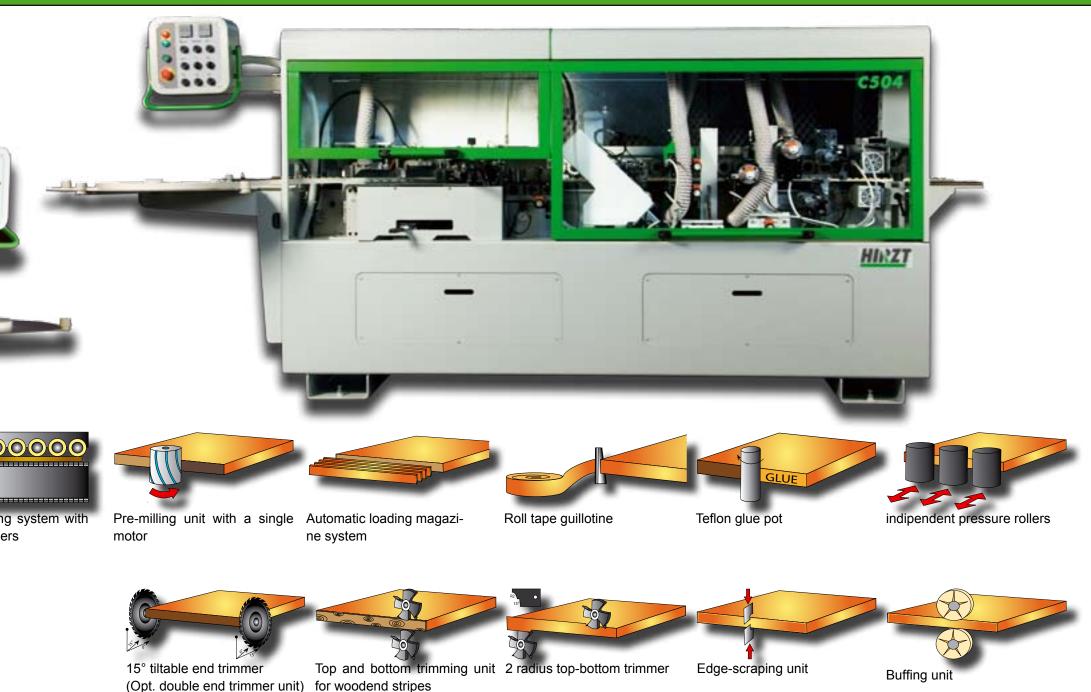

C 504 is an electronic edgebander completely controlled from board, compact and flexible that with its PATENT exceeds the pre-milling panel technology known until today and it extends it also to small and medium companies.

A simple technology that allows to reach high performance and a decimal precision like the one of the bigger industrial edgebanding plants. Technologies inaccesible in the past, with C 504 become a constant.

C 504

All units of C 504 - C 600 require a minimum maintenance and are very simple to regulate.

The end-trimmer, thanks to its double saw (2 for front cut and 2 for back cut) grants an end-trimming of high precision, both front and back, giving the possibility to pass, directly from the control board to 15° tiltable cut.

The top and bottom trimming/roughing unit for frontal cut, selectable from control board, ensures to process wooden strips up to 8 mm.

The 2 profiles top/bottom trimmer, moreover, makes C 504/C 600 flexibile and productive at the same time, by selecting, automatically from board, between 2 solutions: the edged top/bottom trimming at 15° or with radius 2 or 3 mm.

Finishing groups, such us edgescraper and buffing unit, give a high quality, correcting all imperfections and ensuring polished surfaces.

Unparalleled quality

The pre-milling unit that only CLASS C 504 and C 600 offer as standard, brings the compact edge-banders to high level of quality and performance. Two working methods in comparison:

TRADITIONAL EDGEBANDING WITHOUT PRE-MILLING

- Perfection of cut and squaring
 - Insuperable quality

No chipping or defects

CLASS C 600

C 600 IS EQUIPPED WITH:

Panel feed-track with top pressing rollers

PATENTED pre-milling unit with a single motor . (Opt. diamond milling tool)

2 profiles top-bottom trimmer selectable from control board

Optional automatic loading magazine

Electronic rounding unit

Teflon glue pot

Edgescraping unit

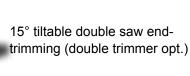

Tape guillotine

Buffing unit

Indipendent pressing rollers

TECHNICAL DATA	CLASS C 504	CLASS C 600
Min-max panel height	10 mm - 50 mm	10 mm - 50 mm
Min-max tape thickness	0,4 mm - 8 mm	0,4 mm - 3 mm (opt. 5 mm)
Panel feeding speed	7/8 m/min	7/8 m/min
Pneumatic pressure	6 bar	6 bar
Power	5,5 Kw	6,0 Kw
HF motors	200 Hz	200 Hz
Dimensions	cm 76 x cm 326 x h cm 150	cm 76 x cm 384 x h cm 150
